Test. Manage. Control.

Notes and Pricing

Paralisa™ Johne's Disease: 0-10 Samples \$12.00 ▪ 11-50 Samples \$10.00 ▪ 51-200 Samples \$9.00
201-499 Samples \$8.00 ▪ 500+ Samples \$7.50 +GST

- Blood (serum or plasma tubes; min. 3ml).
- While refrigeration is desirable it is not essential; please protect samples from extremes of heat or cold.
- Do not freeze.

Individual Faecal PCR: \$40+GST*

- Please use screwtop plastic containers for dung samples and do not submit samples inside examination gloves or ziplock bags.
- Use a fresh glove to collect each sample and avoid cross contamination of samples.
- Min. 3g per sample, ideally 5-10g (1 tablespoon approx.)

Pooled Faecal PCR: \$50+GST* (Pools of 10)

- If sample pooling is requested, send individual samples as we will carry out the pooling here; that way we can easily retest individual samples from positive pools as required.
- If a pool is positive, we will contact you concerning your preference for individual sample re-testing.
- Please use plastic screwtop containers for dung samples and do not submit samples inside examination gloves or ziplock bags. Use a fresh glove to collect each sample and avoid any cross contamination of samples. Dung samples freshly deposited on the ground are acceptable as long they can be unambiguously linked to their originator and land on an otherwise clean surface.

**special pricing is available for custom diagnostic programmes, please call the lab 03 489 4832 to discuss or Simon on 021 249 7710.*

Terms and Conditions

DRL retains ownership of all information and intellectual property derived from the analysis of samples submitted.

The accounts receivable at Otago Innovation Ltd manages the collection of debt for Disease Research Ltd. It is Otago Innovation Ltd practice that all invoices are to be paid by the 20th of the month following (normal commercial practice).

If any debt remains unpaid after 90 days, it will be referred to a collection agency. Collection costs will be incurred by the debtor.
